## Released New Environmentally Friendly Products in India

Western Refrigeration Private Limited (Western), our company in India, has launched four new models of VISI Cooler, the bottle cooler showcase. The product has become more user-friendly and environmentally friendly by reducing its electricity consumption by up to 17.8%, compared to the former models.

In India, people's concern about environmental issues has been increasing, because problems such as air pollution caused by coal-fired power generation and automobile exhaust emissions are getting more serious. In order to meet the needs of the Indian market, last year, Western started to adopt R290, a natural refrigerant which has extremely lower impact on global warming, for Deep Freezer, cooling and freezing stockers. So as to better meet the market's expectations, the natural refrigerant is also used for our new models of VISI Cooler. We are working together with our customers to contribute to the environment.

Hoshizaki group is deeply aware of our responsibility to reduce greenhouse gas emissions by recognizing it as an issue directly related to our business. We have been developing environmentally friendly products through pursuing energy-saving performance and non-fluorocarbon products, while complying with each country's environmental regulation.

SRC950HC-GL

Model	SRC950HC-GL	SRC752HC-GL	SRC502HC-GL	SRC500HC-GL
External dimensions (W x D x H)	1025 x 707 x 2052	723 x 707 x 2060	583 x 707 x 2076	583 x 695 x 2060
Effective capacity	738L	553L	432L	420L
Energy consumption per hour	225W	154W	142W	
Power supply	230V 60Hz			
Refrigerant	R290
